Roles and Responsibilities of the Students Mentoring and Counselling Cell (SMCC)

The Students Mentoring and Counselling Cell (SMCC) plays a crucial role in providing support and guidance to students in an educational institution. This cell assists students in their academic and personal development, addressing their concerns, and helping them navigate their college life effectively. Here are some common roles and responsibilities of a Students Mentoring and Counselling Cell:

- 1. Academic Guidance:** The SMCC provides academic mentoring, guiding students in their studies, helping them set academic goals, and providing strategies to overcome academic challenges. They may also assist students in selecting courses or specializations.
- 2. Personal Counselling:** The SMCC should offer personal counselling to students who may be dealing with personal issues, stress, anxiety, depression, or other mental health concerns.
- 3. Career Counselling:** The SMCC often provides career guidance to students, helping them understand their strengths, interests, and potential career paths. This can include advice on internships, job placements, higher education, and more.
- 4. Peer Mentoring:** The SMCC might facilitate peer mentoring programs where senior students guide and support junior students.
- 5. Workshops and Seminars:** The SMCC often organizes workshops and seminars on topics like stress management, time management, study skills, career planning, and more.
- 6. Referrals:** If a student's needs are beyond the scope of the SMCC, the cell should refer them to external resources or professionals such as psychiatrists, psychologists, or specialized career counsellors.
- 7. Crisis Intervention:** The SMCC should be prepared to provide immediate support and intervention in crisis situations, such as incidents of self-harm, suicidal ideation, or acute mental health crises.
- 8. Confidentiality:** The SMCC should maintain strict confidentiality of all interactions with students, unless there is a risk of harm to the student or others.
- 9. Awareness Programs:** The SMCC should conduct awareness programs to educate students about mental health, stress management, and available support services.
- 10. Feedback and Follow-ups:** The SMCC should regularly follow up with students to check their progress and well-being. They should also be open to receiving feedback from students to improve the support services.

SIMS College of Pharmacy

Affiliated to Acharya Nagarjuna University, Approved by AICTE, P.C.I. and Govt. of A.P.
Mangaldas Nagar, GUNTUR - 522 001. A.P. India
